

July 5, 2005

For over 2 years already, we offer the citytech and the sprintech to our loyal customers. These 2 mirrors are high quality product and offer great value. It takes only few seconds to install and it is a trouble free items fro us. Canadian cyclist simply loves them!

Every rider, who really care about there security, should own a citytech or sprintech mirror.

Personally, I like the road version. You can now have a reliable mirror without loosing the racing look of your high performance bike.

CD project rule!
